PROFESSIONAL SUMMARY

Data Analyst with a Master's in Analytics and 2+ years of experience transforming complex data into actionable insights using SQL, Python, and Power BI. Proven ability to build dashboards, automate reporting, and identify trends that drive business decisions. Strong foundation in data validation, root cause analysis, and stakeholder communication. Seeking entry-level Data Analyst role to apply analytical skills and deliver measurable impact.

TECHNICAL SKILLS

- **Data Analysis:** SQL, Python (Pandas, NumPy, ML), Excel, Data Validation, Trend Analysis
- **Visualization:** Power BI, Tableau (familiar), Dashboards, KPI Tracking
- **Data Operations:** Root Cause Analysis, Data Quality, Reporting Automation
- **Tools:** Jira, Confluence, ServiceNow, GitHub

CERTIFICATIONS

- Python Data Products for Predictive Analytics Specialization
- PCEP Python Certified
- Applied Data Science with Python Specialization
- Python Data Associate | SQL Associate

RELEVANT EXPERIENCE

Infrastructure Engineer 1
Invesco Ltd. — Hyderabad, India *Nov 2021 – Aug 2023*

Positioned as data-focused role supporting enterprise systems through SQL, Python, and BI tools.

- **SQL Data Extraction & Analysis:** Wrote complex SQL queries to extract, validate, and analyze operational data across APAC, EMEA, and North America; identified trends and discrepancies that reduced incident recurrence by 15%
- **Dashboard Development:** Built interactive **Power BI dashboards** tracking KPIs (incident volume, SLA achievement, resolution time); enabled leadership to proactively address performance gaps
- **Process Automation:** Automated repetitive data validation and reporting workflows using **Python (Pandas, NumPy)**, reducing manual effort by approximately 30% and improving data accuracy
- **Root Cause Analysis:** Performed RCA on data discrepancies and system issues; delivered detailed findings with actionable recommendations to stakeholders
- **Cross-Functional Collaboration:** Partnered with business and technical teams to understand requirements and translate data into clear insights for decision-making
- Led global 24/7 IT operations across APAC/EMEA/NA, automating validation/reporting with Python and delivering analytics through Power BI while consistently ranking top in ticket closure and independent execution.
- Improved infrastructure stability by managing AD/database access, diagnosing root causes, and proactively monitoring job failures to reduce incidents and streamline operations.

PROJECTS

Supply Chain Analytics Dashboard | *Power BI, DAX*

- Built interactive dashboard analyzing delivery performance and profit drivers; identified that **50%+ of deliveries were late**

- Created a "What-If" simulator that showed **31% potential profit increase** through strategic adjustments

Spotify Listening Behavior Analysis | *Power BI, DAX, Time Intelligence*

- Analyzed personal streaming history to uncover listening patterns, top artists, and daily/hourly behavior trends
- Delivered insights on average listening habits and peak activity times by day of week

Olist Brazilian E-Commerce Dashboard | *Power BI, Data Modeling, DAX*

- Analyzed sales performance, customer behavior, and seller trends for an online marketplace
- Identified top-performing product categories and payment method preferences to support business decisions

Weather Image Classifier | *Python, PyTorch, FastAPI*

- Built deep learning CNN model to classify weather conditions (sunny, rainy, cloudy) from images
- Deployed as a web API with front-end interface, demonstrating end-to-end ML pipeline

---

EDUCATION

- **Master of Science in Analytics** | *Northeastern University — Toronto, ON*
- **Bachelor of Engineering in Information Technology** | *Osmania University — Hyderabad, India*
