SUMMARY

Results-driven Data Analyst and Infrastructure Engineer with a Master's in Analytics and hands-on experience in enterprise IT operations, data analysis, and automation. Skilled in Python, SQL, Power BI, and ServiceNow, with a strong foundation in incident management, data validation, and workflow optimization. Combines technical expertise with a customer-focused mindset to deliver reliable, data-driven solutions. Seeking opportunities in data analytics, business intelligence, or automation where analytical skills and operational experience drive measurable impact.

TECHNICAL SKILLS

- **Programming & Tools:** Python (Pandas, NumPy), SQL, Power BI, Flask, Excel
- **Platforms & Systems:** ServiceNow, Jira, Confluence, Active Directory, Autosys
- **Data & Analytics:** Exploratory Data Analysis (EDA), Data Validation, Root Cause Analysis, Reporting Automation
- **Methodologies:** ITIL Framework, Incident Management, Change Management, NOC Monitoring

CERTIFICATIONS

- PCEP Python Certified Programmer
- Python Data Analyst Associate | SQL Associate
- PL-300 & AZ-900 (in progress)

EXPERIENCE

Infrastructure Engineer (Service Desk)

Invesco Ltd. — Hyderabad, India | *November 2021 – August 2023*

Supported enterprise financial systems in a 24/7 high-availability production environment, ensuring operational stability, incident resolution, and infrastructure coordination across global regions.

- Managed 200+ incidents and service requests monthly using ServiceNow, adhering to ITIL-based incident, problem, and change management practices to meet SLA targets
- Conducted NOC-style monitoring, start-of-day (SOD) checks, and batch job validation using Autosys/JilChecker to maintain system health across APAC, EMEA, and North America
- Performed root cause analysis on application, infrastructure, and data-related issues, escalating to L2/L3 teams with detailed technical findings and reducing mean time to resolution (MTTR)
- Queried relational databases using SQL to validate records, investigate data discrepancies, and support issue resolution for business-critical applications
- Automated data validation and repetitive operational workflows using Python, reducing manual effort by approximately 30% and improving accuracy
- Analyzed structured datasets using Python and Power BI to identify incident trends, inconsistencies, and recurring patterns, enabling proactive issue prevention
- Managed Active Directory access, distribution lists, and database roles in compliance with security and audit requirements
- Documented investigations and maintained knowledge base articles in Jira and Confluence, contributing to a 15% reduction in repeat incidents

Recognized for independent shift ownership, high ticket closure volume, and clear communication across technical and business stakeholders.

Concierge

Paragon Security — Toronto, ON
Dec 2025 – Present

- Maintain safety and security protocols in a high-traffic environment, demonstrating strong situational awareness, conflict resolution, and communication skills
- Coordinate with site management to document incidents and ensure compliance with operational procedures

Sales Associate (Internship)

PTE Universe — Hyderabad, India
June 2020 – July 2020

- Supported sales operations in a fast-paced environment, handling customer inquiries and coordinating with internal teams to meet targets
- Developed strong communication, attention-to-detail, & problem-solving skills through client engagement

---

EDUCATION

Master of Science in Analytics
Northeastern University — Toronto, ON
September 2023 – May 2025

Bachelor of Engineering in Information Technology
Muffakham Jah College of Engineering & Technology — Hyderabad, India
August 2017 – July 2021

KEY ACHIEVEMENTS

- Automated recurring data validation tasks using Python, saving 10+ hours per week and reducing manual errors
- Consistently ranked among top performers for ticket closure volume and stakeholder satisfaction at Invesco
- Successfully managed shift independently in a 24/7 global support environment, coordinating across APAC, EMEA, and North America regions
- Known for extreme dedication and flexibility in any type of work environment
